Professional Summary

- Healthcare professional (BAMS) with diverse clinical experience across oncology, hospital medicine, and rural public health. Raised in rural Jammu & Kashmir, I bring firsthand insight into the socio-cultural realities, behavioral patterns, and developmental challenges shaping community outcomes. Combining a solid foundation in Ayurveda with a deep-seated drive toward public policy, social anthropology, and governance, I approach public health indicators and structural bottlenecks as interconnected ecosystems rather than isolated variables. I aspire to leverage this holistic, human-centered paradigm to translate grassroots observations into empathetic, data-backed policy perspectives.

MISSION ALIGNMENT & VISION

- My ultimate professional commitment is to the structural, human, and equitable realization of a Viksit Bharat. I believe that sustainable national transformation cannot be achieved solely through top-down macroeconomic indexing; it requires a compassionate, inclusive narrative that translates policy blueprints into resilient, people-centric public infrastructure. Driven by an enduring interest in literature and narrative documentation, my goal is to understand the citizens behind the statistics, honor their lived experiences, and bring an empathetic, ground-level lens to administrative frameworks. I intend to dedicate my clinical expertise, literary voice, and grassroots perspective to platforms like NITI Aayog to help design public policy that ensures true human flourishing from the ground up.

PROFESSIONAL EXPERIENCE

- Medical Officer**, American Oncology Institute, Jammu. Oct 2023 – Apr 2025
 - Managed comprehensive inpatient and outpatient services within a high-volume oncological health-care setting, balancing clinical precision with evidence-based patient-pathway design.
 - Navigated complex patient interactions, translating medical datasets into culturally adaptive preventative health strategies aligned with national health goals.
 - Conducted independent community-oriented health awareness initiatives, including counseling on maternal nutrition, breast cancer, and menstrual hygiene in local schools and communities.
- Medical Officer**, JK Medicity, Jammu. Oct 2020 – Jun 2022
 - Delivered clinical care and managed patient services across intensive inpatient and outpatient departments in a high-volume setting.
 - Focused on therapeutic communication, guiding patients through complex treatment pathways and translating clinical data into accessible, culturally adaptive preventive health measures.
- Volunteer Doctor**, Primary Health Centre (PHC), Mangit, J&K. Apr 2019 – Jul 2019
 - Gained direct exposure to rural healthcare delivery, documenting infrastructural constraints, supply-chain challenges, and grassroots public health implementation barriers.
 - Collaborated with local healthcare workers to assess patient demographics and behavioral barriers to accessible care, acting as a trusted intermediary to build institutional trust.
- Rotatory Intern**, Govt. District Hospital (Gandhi Nagar) & Govt. Ayurvedic Hospital, Jammu. 2018 – 2019
 - Underwent rigorous clinical training across both allopathic and Ayurvedic healthcare systems, observing emergency triage optimization and the administrative complexities of state-run hospitals.
 - Developed an integrated understanding of preventive healthcare, clinical management, and public health service delivery for systemic lifestyle and chronic metabolic disorders.
 - Observed how traditional preventive models and modern clinical infrastructure complement one another to optimize grassroots health metrics.

Education

■ Bachelor of Ayurvedic Medicine & Surgery (BAMS)

Graduation: 2019

Jammu Institute of Ayurveda and Research, Nardani, Jammu | Jammu & Kashmir

Core focus: Preventative healthcare, lifestyle & metabolic disorders, holistic well-being ecosystems.

CORE STRENGTHS & SKILLS

Policy & Qualitative Research:	■ Qualitative analysis, policy writing, cross-sectoral development analysis, narrative research.
Systems Perspective:	■ Public health systems management, rural and grassroots administrative understanding, stakeholder communication.
Community Engagement:	■ Public health awareness design, intercultural communication, community outreach, and advocacy.
Tools:	■ MS Word, PowerPoint.

ACADEMIC & DISCIPLINARY INTERESTS

Social Anthropology & Demography	■ Studying population dynamics, lineage, and cultural factors influencing community development.
Indian Polity & Cooperative Federalism	■ Understanding center-state dynamics, policy devolution, and institutional implementation frameworks.
Rural Development & Governance	■ Analyzing administrative mechanisms that drive structural improvements in underserved regions.
Literature & Narrative Documentation:	■ Exploring regional traditions and documenting oral, folk, and Sufi histories to humanize public datasets.

LANGUAGES & LITERACY

Languages	■ Kashmiri (Native), Urdu (Fluent), Hindi (Fluent), English (Professional/Academic). <i>Classical script literacy:</i> Sanskrit & Arabic (reading proficiency).
